Experience

Frontend Developer

Infri branches

Feb 2022 - Jul 2022 (6 months)

During this period I was in charge of designing the user dashboard using react.js and material UI and consuming the backend API using AXIOS.js.
I wrote about 70 percent of the code for the admin frontend application.

Frontend Developer

Thembani Afica Guarantee Fund

Mar 2022 - Sep 2022 (7 months)

Thembani Africa is a Credit Guarantee and Business Development Service Company aiming to enhance financial Inclusion in Africa and bring SMEs into the mainstream economy
⊚ I am responsible for building the user dashboard built with HTML5, Tailwindcss, and Javascript
⊚ The goal of the web app is to build a platform where you could take a loan

Frontend Developer

E-Settlement Limited

Jan 2022 - Present (9 months +)

The PayCentre web and mobile app grant you the freedom to receive and provide banking hall services by offering you the best agency banking solution in Africa.

Since joining Paycenter, I have updated and designed the Paycenter website using HTML, CSS, Javascript and react.js.

It was challenging but an excellent way to improve my front-end skills and web Development.

Front End Lead
Munche.services
Nov 2021 - Present (11 months +)
Peer-to-peer food delivery service for Africa.

Munche is on a mission to make sure your tummy is filled with food on time while giving users an opportunity to earn.

I am in charge of building and maintaining the admin dashboard and landing page using Next.js and React.js.

built with next.js, React.js, Javascript material Ui, and tailwind CSS.

I was able to build a web app where you can order meals and have them delivered to your doorstep. The process was challenging but fun as well.

Intern
Side Hustle
